

When It Comes to Asset Tracking, No Other IoT Company Stacks Up.

ThingTech Real-Time Asset Tracking

- Accurate** GPS Tracking Device
- Reliable** Network Connectivity
- Secure** Cloud Storage
- Seamless** API Integration
- Intuitive** Software Application

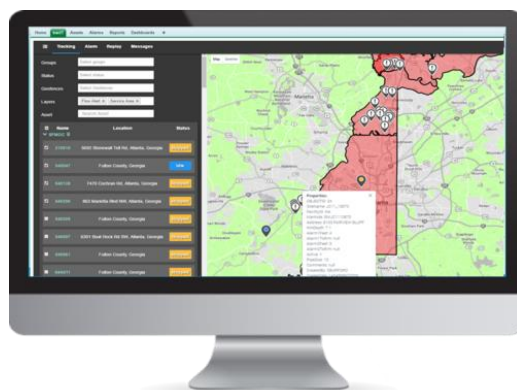

FEATURES

- ▶ Real-time GPS and cellular tracking
- ▶ Plug-and-play devices (hardware agnostic)
- ▶ Out-of-the-box and custom reporting
- ▶ Intuitive software application
- ▶ Easy hardware installation
- ▶ Out of the box integrations including Salesforce, ESRI, and more

BENEFITS

- ▶ Track location and movement in real-time
- ▶ Improve accountability by monitoring the chain-of-custody
- ▶ Better manage and protect high-value assets with real-time location and movement alerts
- ▶ Reduce the cost of insurance premiums
- ▶ Reduce repair, labor and replacement costs with predictive maintenance

“When we switched to ThingTech from our old GPS tracking solution, access to the data is much better than what we had before. Plus, we were immediately alerted when a theft occurred and we were able to recover \$300,000 of property using ThingTech.” — Chris Entrekim, Fleet and Asset Manager, Aubrey Silvey Construction

Save time and money with our scalable asset tracking solution. Know exactly where all your assets are at any point in your supply chain.
