WHEN IT COMES TO ASSET TRACKING,

NO OTHER COMPANY STACKS UP.

ThingTech Real Time:

Accurate GPS Tracking

Robust Reports and Dashboards

Intelligent Predictive Analytics

Seamless API Integration

Intuitive Software Application

Optimize your operations with ThingTech Real-Time. Our award-winning IoT platform gives you the ability to manage your fleet and assets in real-time, enabling agile and adaptive decision making.

Enhance visibility into field operations by gathering real-time data from assets in transit or at rest. Automate alerts that are triggered based on pre-defined business logic and workflows. The volume of data generated can be vast and complex. Our expertise is turning operational data into actionable data, enabling you to improve asset lifecycles, efficiency and utilization.

Take advantage of our hardware agnostic platform, which supports OBD-II, hardwired, and short-range devices (e.g. RFID, BLE, NFC)

Features

— End-to-end IoT Platform

— Real-time GPS and cellular tracking

— Plug-and-play devices (hardware agnostic)

— Out-of-the-box and custom reporting

— Salesforce, EAM, ERP integration

— Intuitive software application

— Easy hardware installation

Benefits

— Better manage and protect high-value assets with real-time location and movement alerts

— Improve operational efficiencies

— Cut fuel and insurance costs

— Reduce repair, labor and replacement costs with predictive maintenance

— Improve accountability by monitoring the chain-of-custody
